

The Lean Start-Up Approach: Test, Tweak, Succeed

Building a business doesn't mean betting your life savings. The Lean Start-Up model helps you validate your ideas, test the market, and pivot quickly without wasting time or money.

Jas and **Jude** will take you through the principles of lean start-up thinking, helping you get your business idea off the ground—fast and cheap—and ready to scale.

What to Expect:

- **Lean Start-Up 101:** Why start small and grow strategically?
- **Minimum Viable Product (MVP):** How to test your idea with as little investment as possible.
- **Validating Your Business Idea:** Get feedback, tweak, and adapt until you get it right.
- **Avoiding the Pitfalls:** Common mistakes that lead to expensive failures.

By the end, you'll have the confidence and tools to launch and iterate like a pro—without emptying your bank account.
